iPOS Receipt Layout

Introduction

This document serves to provide guidelines to a developer who is integrating into eSocket.POS on the information that should be printed on the Receipt.

Merchant Copy

This refers to the receipt that is left with the merchant after an EFT transaction. The below details are expected to be printed on the receipt.

N.B. The receipt should clearly be marked "MERCHANT COPY"

- Retrieval Reference Number
- Terminal ID
- Card Number - Only the first 6 and last 4 digits should be shown in the clear to protect the cardholder and the rest should be masked.
- Transaction Date and Time
- Method – this refers to the PAN entry mode i.e. whether the card number was obtained through a swipe, tap, insert or if it was entered manually.
- Response Message - e.g. Approved, Insufficient Funds, Incorrect Pin etc.
- Value for GOODS, CASHBACK as well as the TOTAL should be clearly displayed for a PURCHASE with CASHBACK transaction.
- Customer signature – a line where the customer can sign.

Customer Copy
